

# SmartIndexer API

Adres url API: <https://smartindexer.net/api.php>

Parameters:

**apikey** [string] - API key available in the panel

**cmd** [string] - two commands are available:

- **submit** - link submission
- **remaininglimit** - remaining links limit

**campaign** [string] - campaign name

**urls** [string] - list of url's to upload

Note that there is no dripfeed parameter, you set this parameter in the panel (<https://app.smartindexer.net/#/settings> - API default dripfeed)- there you can set how you want to dripfeed your links.

example implementation:

```
curl -s -X POST -d "apikey=YOUR-API-KEY&cmd=remaininglimit" "https://smartindexer.net/api.php"
```
